# Assignment Lab 8

This is extension to lab6 assignment. Now the same thing is implemented in ionic for hybrid app.
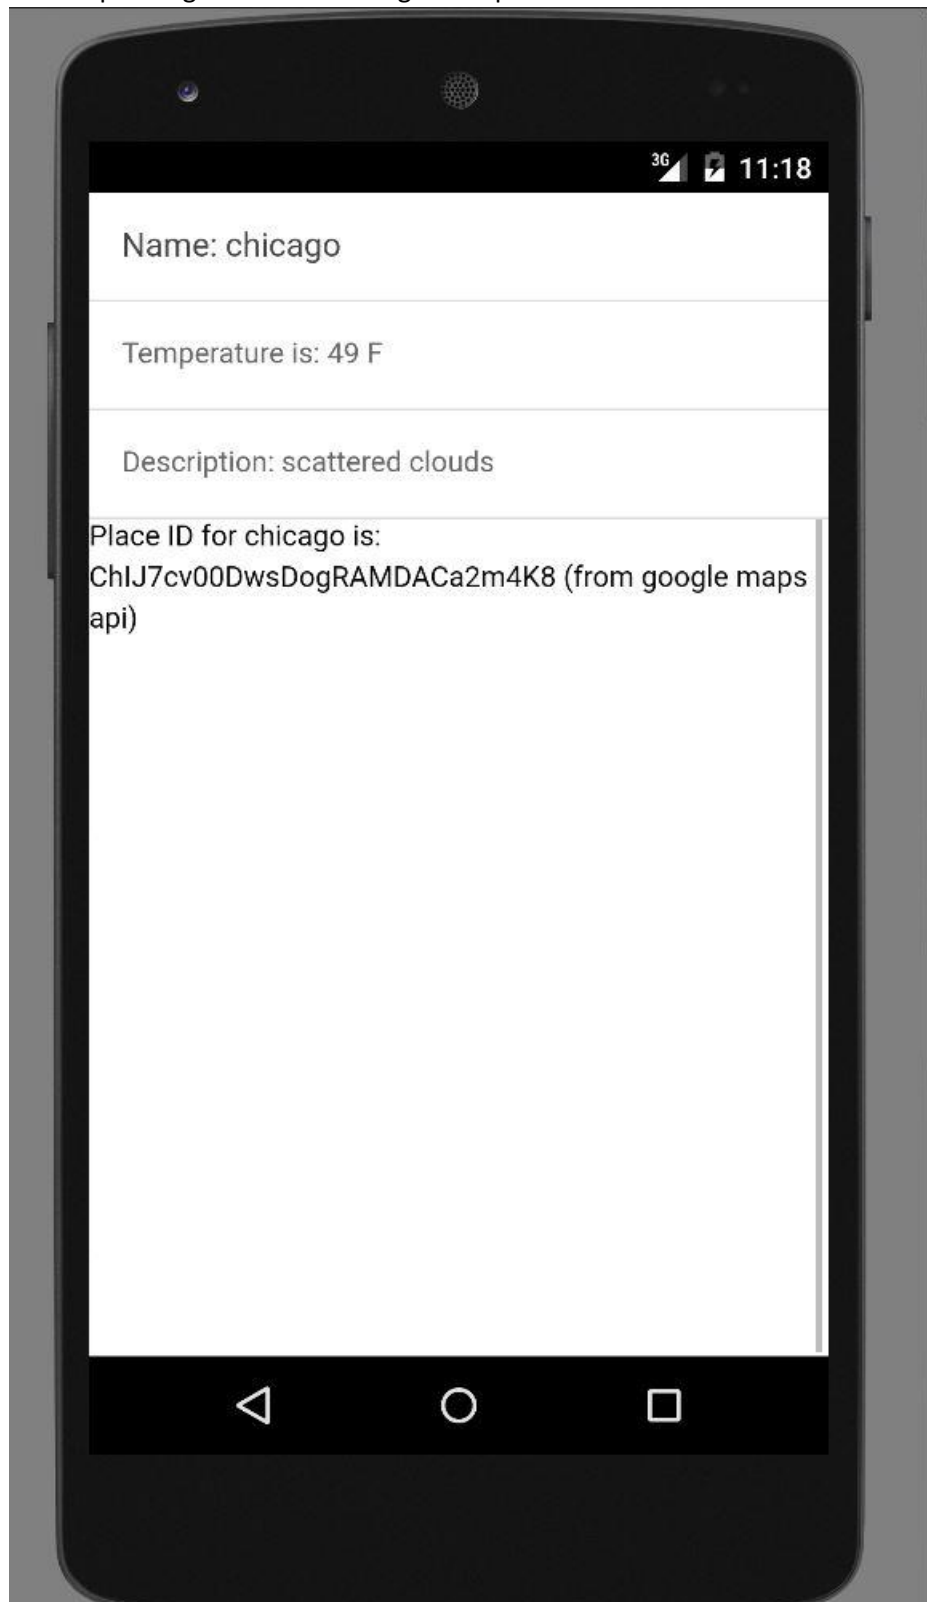

First Page:

User enters a city name:

Then taps on "get weather" and gets output:

Another example:

Name: new york

Temperature is: 50 F

Description: overcast clouds

Place ID for new york is:
ChIJOwg_06VPwokRYv534QaPC8g (from google maps api)
